2 - What two or three elements of this course contributed most to your learning?

Response Rate 7/21 (33.33%)

- prof's willingness to help - prof's time allocation to in class examples
- Creating an environment where I can ask questions without being made to feel stupid
- the second half period after lecture, where we were given a challenging problem and had to solve. - how the material was presented in a learning manner, making it that anybody who gave 100% effort will not only succeed but learn immensely.
- Class engagement, Helpful study tools provided, and In class questioning
- It really helped reviewing the exam reviews for the test.
- Office Hours were very helpful. He did a great job at making time for his students and helping us -Practice Problems. They were difficult and I needed a lot of help, but they helped a lot for the tests. Our professor was also very willing to help us and making sure that we understand what is going on.
- Professor Gonzales is one of the best professors I have had at SMU. He is incredibly patient, and allows students to ask questions before class, during class, and after class. He made sure that any questions were answered and understood for the students to be able to grasp the fundamentals of Economics and succeed. He would make sure to explain a concept in multiple ways to make all methods of learning the concept were available. I loved his method of taking part of the class as a lecture, then doing practice problems that were pertinent to the lecture and exams. I hope he is offered a full-time professor position at SMU so I can continue to take classes taught by him.

3 - What two or three suggestions would you make to improve this course in the future?

Response Rate 7/21 (33.33%)

- Nothing
- Absolute nothing one of the best teachers at smu
- I honestly cant think of any. My favorite class taken in all of uni.
- I would suggest that the homeworks were worth a few more points I would also suggest that the study guides be more similar to the exams
- Some lessons were difficult. More discussion about the homework problems in class.
- - I can't think of anything major other than taking out some of the extra information. Some of the slides seemed unnecessary, but it wasn't anything that distracted from my learning.
- None.
